

Mask covers frame  
horizontally

Text underneath

A diagram illustrating a mask covering a frame horizontally. The frame is a blue-outlined rectangle with a notch on its top edge. The notch is a rectangular cutout on the right side of the top edge. Above the frame, a dotted line represents the mask, which is wider than the frame and covers the top edge of the frame. The text "Mask covers frame horizontally" is positioned above the dotted line, and "Text underneath" is positioned inside the frame, to the left of the notch.
