

Mask covers frame
horizontally

Text underneath

A diagram illustrating a mask covering a frame horizontally. The frame is a blue-outlined rectangle with a notch on its top edge. The notch is a rectangular cutout on the right side of the top edge. A dotted line represents a mask that covers the top portion of the frame, extending from the left edge to the right edge, and also covering the notch. The text "Mask covers frame horizontally" is positioned above the dotted line, and "Text underneath" is positioned below the frame's top edge.
